Accession Number: 202105053033
Requested Date: May 5, 2021 12:00
Report Status: Final
Requested Procedure: 7130
Procedure Description: KIDNEYS/BLADDER:
Modality: US

EXAMINATION DATE: [MAY 05 2021, 12:00]

Ultrasound of the GU tract.

Clinic indication gross hematuria.

Additional information provided by the technologist is that this patient has a history of stones and presents with right flank pain, now gone.

Right kidney 9.6 cm. Left kidney 9.4 cm.

Left kidney is normal.

Right kidney shows mild hydronephrosis for which the direct etiology is not seen.

Unremarkable bladder with bilateral jets seen. Therefore no complete obstruction is present. Prostate is 88 cc, enlarged.

Opinion: Enlarged prostate. Mild right hydronephrosis for which the direct etiology is not seen. As there is no explanation for patient's hematuria additional assessment may be indicated with CT virtual urogram protocol as well as cystoscopy?

This report has been dictated but not reviewed.
